This is an open seminar organized by SPRINT Robotics

Global Outlook
on Maintenance & Inspection Robotics

Asset owners will share their view on solutions they are looking for and current state of the art. Also a scientific perspective will be given on the use of Robotics in the Maintenance & Inspection in the Industry.

5 Key Note Speakers from 5 different Continents:

We invite all asset owners, technology & service providers and all other stakeholders to come, learn, discuss and meet.

This free seminar is offered to you by the
SPRINT Robotics Collaborative.
