TABLETA EDUCAȚIONALĂ ROMÂNESCĂ

Educația digitală nu trebuie să fie un privilegiu!

A hand holding a pencil with a decorative pattern of stars and triangles, drawing a circle on a piece of graph paper. The background is a soft, out-of-focus green.

Ministry of Education:
over 250.000 pupils don't have
access to digital education
infrastructure.

According to a study, the number
of children without access to
online schooling is over 900.000.

In this moment, digital education
became a privilege when actually
it could be part of the solution to
reduce inequalities in the
educational system.

The main problem is the absence of a integrated solution that can offer an educational environment for children/teenagers and teachers that ensures a verified and recommended reference environment for the teaching act.
